

36th International Cotton Conference Bremen 29 and 30 September – Cotton Decoded –

Bremen, 14 June 2022: the starting gun for registration has been fired: the 36th International Cotton Conference Bremen will take place from 29. to 30. September 2022. The conference is organised by the Bremen Fibre Institute e.V. and the Bremen Cotton Exchange. The International Cotton Conference is one of the best-known international symposiums around

The International Cotton Conference will take place in presence again, but also online. Image: © Bremen Cotton Exchange

the topic of cotton and the biggest scientific cotton conference worldwide. Attendance at the conference will be possible in presence in Bremen as well as online.

The International Cotton Conference will take place in the anniversary year of the Bremen Cotton Exchange. The association was founded in 1872 and is celebrating its 150th birthday this year. The festivities will also find their way into the conference, including a big gala dinner and the opening of an exhibition in one of the biggest museums in Germany, the Übersee-Museum (Overseas Museum) Bremen.

„Because of our anniversary, we would of course like to welcome as many guests as possible from home and abroad in person in Bremen. We want to celebrate our founding jubilee. At the same time, we would like to continue the exchange about specialist issues that is traditionally very important at the conference in presence. From our point of view, personal meetings are more wanted than ever after the pandemic restrictions”, emphasises **Stephanie Silber**, President of the Bremen

Cotton Exchange. Of course, an online stream will be set up for guests who cannot come to Bremen, so participation via video conferencing is also possible.

Highlights of the Conference and Anniversary Week

- First association meetings and work groups from 27 to 28 September 2022 at the Bremen Cotton Exchange, at the Fibre Institute and online
- Official opening of the 36th International Cotton Conference Bremen on 29 September. The conference venue this time is the Chamber of Commerce in Bremen, right at the market place and in the neighbourhood of the Cotton Exchange. The Chamber of Commerce has been representing the interests of trade in Bremen since 1451.
- On the same day, a cotton exhibition about the cultural history of the raw material in the past, the present and in the future will be opened at the Übersee-Museum Bremen.

The Cotton Conference:

Sustainability and Climate Protection

- Crucial questions of sustainability in cotton growing, of cotton quality, but also of the usage of cotton as well as its processing into innovative textiles and other products will take centre stage in the programme of the International Cotton Conference Bremen. Climate protection and the capacity of the cotton plant to store carbon climate-neutrally in the ground play a special role. Digital procedures are increasingly used to check soil health.

Circular Economy, Transparency and Traceability

- Furthermore, the conference will address processes of circular economy that focus on modern methods of textile recycling. Biodegradability of cotton will also play a central role once more. Last but not least, the conference will deal with questions of transparency and traceability within the supply chain and present efficient, digitally managed control methods.

Innovative Products Made of Cotton

- Moreover, the discussion about new and innovative processing options for cotton is intended to make a mark and to increase interest in this biodegradable and regrowing raw material.

Keynotes to the Point

- As always, the keynotes can be highly anticipated, when personalities from the branch will critically address challenges within world economy and politics.

We will continually inform about the International Cotton Conference on 29 and 30 September and about the complete programme in the run-up in the form of further press releases as well as target-group-specific newsletters and also via our social media channels.

The starting gun for the registration has been fired: you can register at <https://cotton-conference-bremen.de/> from now on. You will also find regularly updated information there.

Media representatives, please directly turn to our press contact for **Accreditation**:

Elke Hortmeyer, Director Communication and International Relations

Of course, we cordially invite all interested media representatives already now to visit the hybrid edition of the 36th International Cotton Conference. We gladly support the choice of suitable interview partners. We appreciate all forms of media coverage even in the run-up to the conference. We are gladly available for further questions and interviews.

About the Bremen Cotton Exchange

- Founded in 1872 to strengthen the interests of the cotton trade and consumption in Germany, the Bremen Cotton Exchange has now been in the cotton business for 150 years. As an international court of arbitration, the Bremen Cotton Exchange always stands for neutrality.
- We offer various services to our members. Clear and neutral data and analyses are a part of this.
- As the ICA Bremen, together with the International Cotton Association in Liverpool and in cooperation with the Fibre Institute Bremen, we provide the International Quality Testing and Research Centre in Bremen. The Hanseatic city has now become the international centre for cotton testing and research, quality training and certification.
- We represent our members in all the important international bodies in the cotton world.

About the Fibre Institute Bremen e. V. (FIBRE)

- In its 66-years history, the Institute has developed from a cotton testing laboratory into a successful research institute in the fields of future-oriented fibres, technical textiles and fibre composites at the University of Bremen. It deals with basic scientific and application-oriented questions along the entire process chain from fibre production to the manufacturing of fibre composite components and more for the aircraft industry.
- FIBRE's central international importance in cotton is shown by its work on the international harmonisation of cotton testing [e.g. round tests in cooperation with the ICAC and USDA-AMS], its work in central committees [ICAC Committee on Standardised Instrument Testing of Cotton (CSITC), ITMF Cotton Testing.
